上海福赛特技术股份有限公司是一家基于复杂精密机械设计和精准运动控制，及人工智能等自动化智能化核心技术的高端专用智能设备供应商。公司融合对应用领域的深度理解，产品已应用于新材料、新能源、半导体和智能交通等战略性新兴产业。

在新材料行业,公司构建了一套完备的核心工艺设备矩阵,涵盖工业膜元件智能卷膜设备、民用膜元件智能卷膜设备、精密铸膜涂膜一体智能制造设备、一体化智能工厂解决方案等。通过自主研发和技术创

新, 公司成功打破了国外高端设备的市场垄断,实现了进口替代, 成为推动行业自动化、智能化进程的领航者。

公司曾获上海领军人才专项、上海人才发展基金专项、上海创新资金专项等专项资金支持。此外, 公司取得国家高新技术企业、上海市“专精特新”企业等称号。截至2024年5月末, 公司专利总数量为216项, 其中发明专利为65项。

Shanghai Foresight Technology Co, Ltd. is a supplier of high-end specialized intelligent systems, leveraging core technologies in sophisticated mechanical design, precise motion control, and artificial intelligence. The company's products are employed in strategic emerging industries such as new material, sustainable energy, semiconductors, and intelligent transportation.

In the membrane technology sector, Foresight Technology provides a comprehensive suite of core process systems, including the **Intelligent Industrial RO/NF Membrane Element Manufacturing System**, **Intelligent Domestic RO Membrane Element Manufacturing System**, **Intelligent Precise Membrane Coating Manufacturing System**, and **One-stop Intelligent Factory Solutions**, etc. Through independent research and development and technological innovation, the company has successfully broken the monopoly of foreign high-end equipment, achieved import substitution, and become a leader in promoting the automation and intellectualization of the industry.

By the end of May 2024, Foresight has 216 patents in total, including 65 for inventions.

## 工业膜元件智能制造设备

Industrial Membrane Element Intelligent Manufacturing System

## 产品介绍

### INTRODUCTION

FST-ME2000工业膜元件智能卷膜设备是上海福赛特技术股份有限公司为工业膜元件制造企业提供的全自动化智能制造整体解决方案，可生产低压膜元件、纳滤膜元件、苦咸水膜元件、抗污染膜元件、海水淡化膜元件、盐湖提锂膜元件等多种应用场景的工业及市政用膜元件。

FST-ME2000包含了膜处理单元、滤芯卷绕单元、导流布及管布焊接单元、机器人搬运单元1、下线单元、常温固化线、机器人搬运单元2、NG下料单元、滤芯处理单元、玻纤缠绕单元、高温固化线。

The FST-ME2000 Industrial Membrane Element Intelligent Manufacturing System is a fully automated solution for industrial membrane element manufacturers. This system can produce low-pressure, nanofiltration, brackish water, anti-pollution, seawater desalination, lithium extraction, and other industrial and municipal membrane elements.

The FST-ME2000 includes a membrane processing unit, membrane rolling unit, spacer and tube welding unit, robot transferring units, unloading unit, room temperature curing line, NG blanking unit, membrane element assembly unit, glass fiber winding unit, and high temperature curing line.

产品参数  
PARAMETERS

类别 Item	内容 Contents
兼容范围 Compatibility	10040, 8040, 6040, 4040
膜片页数 Layers of Membrane	4040: 4-7 页/Layers 8040: 21-28 页/Layers
中心管端口 Port of Central Tube	圆形 Rounded
生产节拍 Cycle Time	8040-25页膜: 9 分钟/支 4040-6页膜: 4 分钟/支 9 min/pcs for 25-layer 8040 4 min/pcs for 6-layer 4040
产品切换时间 Product Changeover Time	软件一键切换程序, 物料45分钟内调整完毕 Within 45 mins, one-click software switching program
设备组成 Components	折膜单元*1, 卷膜单元*2, 焊接单元*1, 固化立库*1, 后道装配*1, 玻纤缠绕*1, 高温固化炉*1 Folding Unit * 1, Rolling Unit * 2, Welding Unit * 1, Vertical Curing Storage * 1, Post-Processing Assembly * 1, Fiberglass Winding * 1, High-Temperature Curing Oven * 1
设备功率 Power	总功率258 kW, 其中前段70 kW、固化立库16 kW、后段40 kW、高温固化炉132 kW Total 258 kW (Front-Processing Units 70 kW, Vertical Curing Storage 16 kW, Post-Processing Unit 40 kW, and High-Temperature Curing Oven 132 kW)
气源 Air Supply	0.5-0.7 mPa, 3 m <sup>3</sup> /min
设备占地 Dimensions	L46m*W9m*H4m

## 产品介绍

### INTRODUCTION

工业膜智能工厂是上海福赛特技术股份有限公司为工业膜元件制造企业提供的全自动化智能制造整体解决方案，可生产低压膜元件、纳滤膜元件、苦咸水膜元件、抗污染膜元件、海水淡化膜元件、盐湖提锂膜元件等多种应用场景的工业及市政用膜元件。该方案包含了前端卷膜线、固化立库、后端滤芯处理线、机器人搬运AGV、原料立库、成品立库、信息化系统及中央控制系统等。

Shanghai Foresight Technology Co., Ltd. offers an Intelligent Factory solution for manufacturing various industrial and municipal membrane elements. This fully automated system can produce low-pressure, nanofiltration, brackish water, anti-pollution, seawater desalination, and lithium extraction membrane elements. Key components include a Pre-Processing Rolling Line, Vertical Curing Storage, Post-Processing Assembly Line, AGVs, Vertical Raw Material Storage, Vertical Final Products Storage, an Informatization System, and a Central Control System.

## 产品参数

## PARAMETERS

工艺 Process	类别 Option	配置 (N数值按照产能配置) Configuration (N configured as per production capacity)
前段卷膜线 Pre-Processing Rolling Line	标配	折膜站*N、焊接站*N、卷膜站*2N、中心管供料*N Folding Unit*N, Welding Unit*N, Rolling Unit*2N, Tube Feeding*N
固化立库 Vertical Curing Storage	标配	固化立库容量按产能配置, 可做成常温或恒温 Capacity configured according to the production requirements, and room temperature or constant temperature available.
后段滤芯处理线 Post-Processing Assembly Line	标配	滤芯处理站*N、缠丝站*N、固化炉*N、NG料架*N、外形检测*N、装袋*N、装支架*N、装箱*N、码垛*N Element Processing Unit*N, Wrapping Unit*N, Curing Oven*N, NG Shelf*N, Profile Inspection*N, Bagging*N, Racking*N, Cartoning*N, Palletizing*N
AGV	标配	叉取式AGV、潜伏式AGV、潜伏叉取式AGV,数量按产能需求配置 Forklift AGVs, Towing AGVs. AGV quantity configured according to production requirements
原料立库 Vertical Raw Material Storage	选配	固化立库容量按产能需求配置, 膜片库恒温恒湿 Capacity configured according to production requirements; Membrane sheets warehouse constant temperature and humidity
成品立库 Vertical Final Products Storage	选配	成品立库容量按产能需求配置 Capacity configured according to production requirements
中央控制系统 Central Control System	选配	数据中心, 可监控所有产线生产数据 Data center monitoring all line production data
信息化 Informatization	标配	全车间智能化生产、信息化管理 Intelligent production and information management of the whole workshop.

## 工艺流程 PROCESS

## 民用膜元件智能制造设备

Domestic Membrane Element Intelligent Manufacturing System

## 产品介绍

### INTRODUCTION

FST-ME300民用膜元件智能卷膜设备是上海福赛特技术股份有限公司为民用膜元件制造企业提供的民用滤芯全自动化生产制造整体解决方案。

FST-ME300包含了滤芯制造的前段工艺(即叠膜、卷膜、中心管处理到固化)和后段工艺(即切边剥边、滤芯转运、O型圈装配、气密性检测、挡水圈装配、端盖装配、贴标、缠止水胶带、扫码),具备信息系统、故障报警处理系统、安防系统、控制系统。

The FST-ME300 Domestic Membrane Element Intelligent Manufacturing System is a fully automated manufacturing solution for domestic membrane elements manufacturers.

The FST-ME300 includes the front-end process of element manufacturing (membrane folding & rolling, central tube processing, curing) and the back-end process (trimming, element transfer, O-ring assembly, vacuum inspection, Y-ring assembly, end cup installation labeling, white tape wrapping, code scanning), equipped with information system, fault alarm processing system, security system, and control system.

**产品参数**  
PARAMETERS

类别 Item	内容 Contents
产品兼容 Compatibility	50G-1000G
膜片页数 Layer of Membrane	PE基材RO膜: 5-25页 无纺布基材RO膜: 2-13页 PE based: 5-25 layers Non-woven based: 2-13 layers
膜片裁切方式 Membrane Cutting Mode	PE基材RO膜: 纵切 无纺布基材RO膜: 纵切, 横切 PE based: Vertical cutting Non-woven based: Vertical cutting, Horizontal cutting
设备生产节拍 Cycle time	25秒/支 (两页膜) ; 52秒/支 (八页膜) 25 sec/pcs (2 layers) 52 sec/pcs (8 layers)
产品切换时间 Product Changeover Time	软件一键切换程序, 物料35分钟内调整完毕 Within 35 mins, one-click software switching program
设备组成 Component	前道卷膜设备*2, 固化炉*1, 后道装配设备*1 Pre-Processing Rolling Unit*2, Curing Oven*1, Post-Processing Assembly Unit*1
设备功率 Power	总功率64KW, 其中前道46KW、固化炉2KW、后道16KW Total 64 kW (Pre-Processing Rolling Unit 46 kW, Curing Oven 2 kW and Post-processing Assembly Unit 16 kW)
设备占地 Dimensions	L26m*W5m*H3m

## 兼容范围

COMPATIBILITY

类别 Item	内容 Contents
膜片基材 Substrate	无纺布/Non-woven PE
膜片裁切方式 Membrane Cutting Mode	纵切/Vertical cutting 横切（仅适应于无纺布基材） Horizontal cutting (ONLY Non- woven applicable)
膜片页数 Layers of Membrane	无纺布基材（2-13页） / Non-woven (2-13 layers) PE基材（5-25页） / PE (5-25 layers)
中心管 Central Tube	长度：280mm、298mm、334mm 端口类型：U型卡槽，内六角 Length: 280 mm, 298 mm, 334 mm Tube Port Shape: U- shaped, Hexagon

## 工艺流程 PROCESS

## 精密铸膜涂膜一体智能制造设备

Precise Membrane Casting and Coating Intelligent Manufacturing System

## 产品介绍

### INTRODUCTION

FST-CM-WTM-101精密铸膜涂膜一体智能制造设备是上海福赛特技术股份有限公司为制膜企业提供的全自动化生产制造整体解决方案。

FST-MC100包含收/放卷单元、涂布单元、水槽单元、烘箱单元、膜片检测单元、纠偏系统、张力系统、控制系统、信息系统、故障报警处理及安全防护系统。

FST-CM-WTM-101 Intelligent Precise Membrane Casting and Coating Manufacturing System is a fully automated manufacturing solution provided by Shanghai Foresight Technology Co., Ltd. for Membrane Enterprise.

FST-CM-WTM-101 includes rewinding/unwinding unit, coating unit, water tank unit, dryer unit, membrane sheet detection unit, correction system, tension system, control system, information system, error alarm processing and safety protection system.

产品参数  
PARAMETERS

类别 Item	内容 Contents
最大车速 Maximum Speed	20 米/分钟 20 m/min
基材材料 Substrate	无纺布 Non-woven
基材宽度 Substrate Width	1044/1070 mm (41/42英寸) 1044/1070 mm (41/42 inch)
放卷直径范围 Unwinding Diameter Range	200-500 mm
收卷直径范围 Unwinding Diameter Range	100-500 mm
收放卷张力范围 Unwinding/Rewinding Tension Range	50-250 N (< ±10%)
设备占地面积 Dimension	L60m*W11m*H8m

## 产品特点

### FEATURES

A

#### 行业首创的铸膜涂布一体化技术

铸膜、涂膜功能模块化，根据需求可合并一体也可分开单独运行，通过解决节拍均衡及各类膜生产切换的平滑转换问题，可实现超滤、纳滤、反渗透膜的高效生产。

B

#### 高精密涂布技术

设备穿膜长度可达280米，通过高效的张力控制实现涂布膜层与基材之间微米级调控，最终保证各涂布层的厚度均匀一致性，减少膜片表面生产的瑕疵点，保证产品的品质。

C

#### 创新的水槽设计

水槽内导辊可整体提升，生产时可停机举升维护，方便清洁；无需排放溶剂，节约生产物料；穿膜时可实现快速穿膜无需繁琐操作，便于操作维护。

D

#### 智能化纠偏技术

采用智能纠偏系统，检测、控制、反馈、执行精准高效，使膜片在长距离传输中得以精准控制，提高膜片的平整度、均匀性等性能指标，提高设备的稳定性。

E

#### 采用人工智能算法的膜片检测系统

通过由机器视觉、人工智能算法组成的自动检测系统对膜片瑕疵程度进行自学习并不断优化完善，准确检出瑕疵，并对膜片瑕疵处进行自动标记。有效保证了膜片质量。

F

#### 自动化技术和智能技术的完美融合

设备通过精确的过程控制系统，全程PID调节，有效精准地实现了涂布功能；并加入了多项智能化技术，如产品质量智能监控，故障预警及排除指示，配单管理系统，设备一键启停，产品一键换型，使得设备更加易于操作维护。

## 产品特点

### FEATURES

A

#### First All-in-one Technology for Membrane Casting and Coating

The casting and coating functions are modularized, which can be combined as a whole or operated separately according to the demand. Through solving the problems of cycle time balancing and the smooth conversion of various types of membrane switching in production, UF, NF, and RO membrane can be produced efficiently.

B

#### High-Precision Coating Technology

The length of the membrane can reach 280 meters. Through efficient tension control to achieve micron-level regulation between the coated membrane lip and the substrate, the uniformity and consistency in thickness of each coated layer are ultimately ensured, which reduces the defects on the surface and ensures the quality of the product.

C

#### Innovative Water Tank Design

The guide roller in the tank can be lifted as a whole, therefore, during production, maintenance can be easily made, which is convenient for cleaning; No need to discharge solvents, to save production materials; when threading membranes, it can realize fast threading without other operations, convenient for operation and maintenance.

D

#### Intelligent Deviation Correction Technology

With this technology, the detection, control, feedback and execution are precise and efficient, which enables the film to be precisely controlled in long-distance transmission, improves the flatness, uniformity and other performance indexes of the film, and improves the stability of the equipment.

E

#### AI Membrane Inspection System

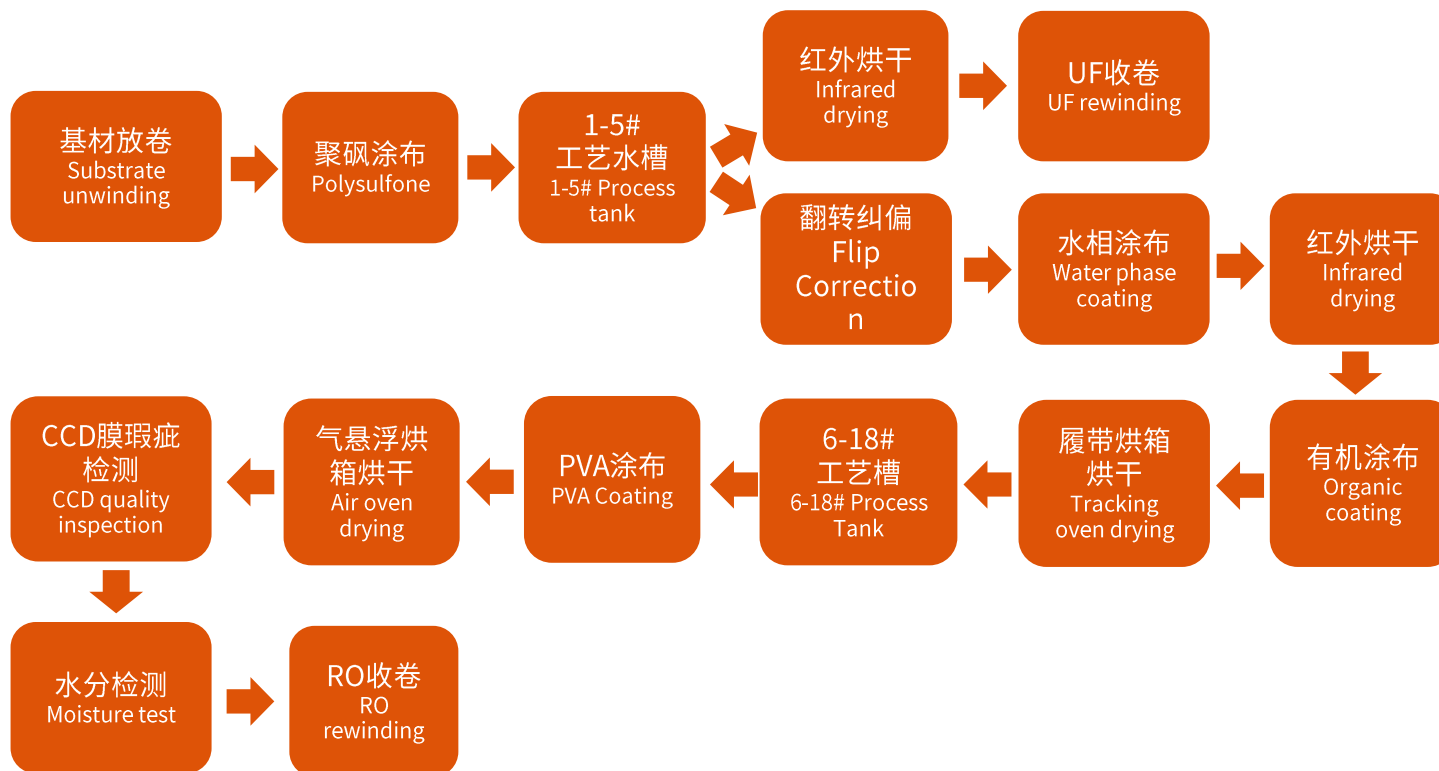

Composed of machine vision and AI algorithms, the automatic inspection system learns and optimizes the degree of film defects, which can accurately detect the defects, and automatically mark the defects on the membrane, making its quality effectively guaranteed.

F

#### Integration of Automation and Intelligence

The equipment realizes the coating function effectively and accurately through the precise process control system and the whole PID adjustment, as well as number of intelligent technologies, such as intelligent monitoring of product quality, warning and troubleshooting instructions, order management system, one-key start/stop, and one-key changeover of the product, etc. added, which makes the equipment easier to be operated and maintained
